Admin is the person who has the full control over the system, it could be an owner or a employee employed by owner. He manages courses details offered by different universities spread across the world. Also he updates events and Blog etc. Other service carried out by him are payments, feedback, enquiry, updating test materials etc.

Agent is the person who carry out application processing in respective countries. He get information about students through this project, also updates application status concurrently.

Customer is the End User who registered into the project. He can choose course as his eligibility criteria satisfies and then by making payment. Also he can access test materials offered under this project. Other privileges for customer are, they can view blog, gallery, post reviews & feedbacks, scholarship assistance and paper preparation.

Guest is normally a End user but it has less accessibility in the services offered. They can become a Customer by registration & payment, then access services offered etc.
